SUMMARY

Pre-final year Computer Science undergraduate with a focused interest in Machine Learning, Generative AI, NLP, and intelligent software systems. Experienced in developing AI-driven applications using Python, FastAPI, Streamlit, and machine learning frameworks, with hands-on exposure to NLP pipelines, LLM-based applications, and model evaluation. I enjoy translating AI concepts into practical, end-to-end applications that combine intelligent models with reliable backend systems, while continuously strengthening my skills through hands-on projects and experimentation.

EDUCATION

NIST University, Berhampur, Odisha *2024 – 2028*

B.Tech in Computer Science & Engineering — CGPA: 8.93/10 | Pre-final Year

Focus: AI/ML, NLP, Generative AI, and Software Development

Kendriya Vidyalaya, Berhampur, Odisha *2023 – 2024*

CBSE Class XII — Science Stream — 69.33%

Kendriya Vidyalaya, Berhampur, Odisha *2021 – 2022*

CBSE Class X — 85.33%

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

ML / AI: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Prompt Engineering, TF-IDF

Frameworks / Libraries: NumPy, Pandas, Scikit-Learn, FastAPI, Streamlit

Tools & Cloud: Git, GitHub, VS Code, Jupyter Notebook, AWS SageMaker

PROJECTS

Finance Agentic AI GitHub *2026*

Tech: Python, Agno, Groq, YFinance, DuckDuckGo Search

- Built a multi-agent financial assistant that provides live stock prices, financial analysis, analyst recommendations, and the latest company news through natural-language queries.
- Integrated YFinance and DuckDuckGo Search as external tools, enabling agents to retrieve real-time market data and relevant financial information for analysis.
- Used Agno with Groq-powered LLMs to orchestrate agent-based reasoning and deliver concise, data-driven financial insights to users.

AI-Powered Code Review Assistant Github *2026*

Tech: Prompt Engineering, OpenAI API, HTML/CSS/JS

- Built a web-based AI code review tool that analyzes submitted code for bugs, security vulnerabilities, performance issues, and code-quality improvements, with automated rewrite suggestions.
- Engineered structured prompts and schema-constrained JSON responses to produce consistent, machine-readable review results and minimize manual output parsing.
- Developed the frontend using HTML, CSS, and JavaScript and integrated the OpenAI API end-to-end to deliver real-time AI-powered code analysis and recommendations.

Email Auto-Reply Suggestion System GitHub *2026*

Tech: Python, NLP, TF-IDF, Machine Learning, FastAPI, Streamlit

- Built an email classification and reply-suggestion system covering 4 intent categories, trained on 50,000 labeled email samples.
- Implemented text preprocessing and TF-IDF vectorization with a Linear SVM classifier, achieving 90.15% accuracy on the test set.

- Developed a role-based reply generation engine that produces professional, context-aware email responses for roles including HR, Manager, Professor, Client, and Employee.
- Shipped a FastAPI backend with an interactive Streamlit frontend featuring To/From fields, intent prediction, role detection, confidence scoring, and full-format email reply generation.

NIST University Helpdesk GitHub *2025*

Tech: TypeScript, Web Development

- Developed a university helpdesk web application for handling common student and campus queries.
- Explored AI-assisted and multilingual interaction to improve accessibility.

ACHIEVEMENTS

- **Smart India Hackathon (SIH) 2025 — 1st Round Selected | The Indian Compass** Selected for the 1st round under the Student Innovation theme for developing The Indian Compass, a technology-driven solution addressing the challenge of showcasing India's rich cultural heritage and traditions. Contributed to problem analysis, solution design, feature planning, and collaborative development of a digital platform aimed at making India's diverse cultural knowledge more accessible and engaging.

CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI, Oracle — August 2026
- AWS Academy Graduate — Machine Learning Foundations (20 hrs), Amazon Web Services — June 2026
- AWS Academy Graduate — Machine Learning for Natural Language Processing (20 hrs), Amazon Web Services — July 2026
- Cloud Collaborative Machine Learning — NIST University — June 2026
- Prompt Engineering, Infosys Springboard — April 2026
- C++ Essentials 1 & 2, Cisco Networking Academy — June 2025

CONFERENCES & WORKSHOPS

- India AI Impact Summit 2026 — Pre-Summit Workshop, IIT Bhubaneswar: sessions on LLM architecture, responsible AI, and AI cybersecurity.
- International Conference on Air Defence and Security (ICADS-26), NIST University — organized with Army Air Defence College, IEEE, and DRDO (February 2026).

FUTURE SCOPE

- **Build a strong career in** AI/ML engineering by gaining practical industry experience and working on real-world AI applications.
- **Continue developing my skills in** Machine Learning, NLP, Generative AI, and LLMs through projects and hands-on learning.
- **Improve my ability to build** complete and reliable AI applications, from model development to backend integration and deployment.
- **Gradually take on more complex problems** and contribute to AI solutions that are genuinely useful in real-world settings.
